

MyCaption Chooses Yap Technology to Power Voice-to-Data Applications

Yap will speech-enable MyCaption's business applications for BlackBerry and voicemail

Sunnyvale, CA—May 4, 2009—MyCaption.com Inc., a leading provider of mobile voice-to-data applications, announced today that it will use speech recognition technology from Yap, Inc. to drive their business applications for BlackBerry® smartphone and PBX Voicemail.

MyCaption enables business users to accurately voice-write™ their email, memos, tasks, contact notes and calendar entries on a BlackBerry smartphone from Research In Motion (RIM). It provides connectivity to enterprise applications through BlackBerry Enterprise Server for Microsoft® Exchange, IBM® Lotus® Domino® and Novell® GroupWise®. Other features include support for multiple email accounts, ample dictation time, text review and customizable dictionary. This application can be downloaded from the company's website, or from the BlackBerry® App World™.

MyCaption for Voicemail converts PBX voicemail into text and delivers it as email, saving time and money for business users on the go.

“We were looking for a technology partner who supported our vision of voice-enabled mobile applications,” said Vipul Bhatt, founder & CEO of MyCaption. “We chose Yap because of their superior technology, scalability, integration features and excellent service. While our voice-to-data workflow includes more than speech recognition, this technology is a key component of it. With this partnership, we feel empowered to innovate more useful applications for the mobile business user.”

“We are pleased to work with MyCaption to support their vision of making the mobile user more productive,” said Igor Jablov, Yap co-founder and CEO. “Partnerships with progressive companies like MyCaption are crucial in our mission to drive mass service provider adoption of high value, low cost applications that harness the power of fully automated speech-to-text technology, such as voicemail-to-text and voice SMS.”

About MyCaption
